Добавление информации о навыках

Я добавила технические навыки и хобби:

```
0 # Skills
1 # For available icons, see: https://docs.hugoblox.com/getting-started/page-builder/#icons
2 skills:
3   - name: Technical
4     items:
5       - name: Python
6         description: ''
7         percent: 50
8         icon: python
9         icon_pack: fab
10      - name: SQL
11        description: ''
12        percent: 90
13        icon: database
14        icon_pack: fas
15      - name: Git
16        description: 'Working with Git and Github'
17        percent: 90
18        icon: git
19        icon_pack: fas
```

Рис. 2: Технические навыки

```
- name: Hobbies
  color: '#eeac02'
  color_border: '#f0bf23'
  items:
    - name: Hiking
      description: ''
      percent: 60
      icon: person-hiking
      icon_pack: fas
    - name: Photography
      description: ''
      percent: 80
      icon: camera-retro
      icon_pack: fas
```

Пост по прошедшей неделе

Я создала папку lastweekofMarch и в ней вставила фотографию и файл index.md:

Рис. 5: Создание папки

Затем я редактировала файл index.md:

```
4 summary:

6
7 # My Last Week Of March
8
9 Hey reader! This month just flew by so fast. I've been so caught up doing schoolwork and practicing my hobbies.
10
11 In the last week of March, I started reading 'Dracula' by Bram Stoker and it's really good. I also started playing the recorder (I can play baby shark and lavender's blue).
12 I visited the atom exhibit at Viskh and learnt about nuclear reactors and so much more, I wish I could have taken you along with me. Besides that I had a math-analysis test which turned out to not be as bad as I expected.
13
14 That actually sums up my week. This would be way better as a video so look out for my vlogs on youtube lol.
15
16 Have a good one!
```

Пост на тему по выбору

Я создала папку Markdown и в ней вставила фотографию и файл markdown.md:

Рис. 7: Создание папки markdown

Затем я редактировала файл markdown.md:

```
1 ---
2 title: Markdown Markup Language
3 date: 31-03-2024
4 summary:
5 ---
6
7 ## What Is Markdown?
8
9 Markdown is a lightweight markup language that allows users to format plain text using easy-to-read easy-to-write syntax. It is widely used for formatting text on the web, in fact I am writing this blog post using markdown myself!
10
11 Markdown syntax is simple and intuitive (especially for those with HTML backgrounds). for example the use of '#' to denote headings (# - header 1, ##- header 2 etc.) and to add pictures to your text you just need an exclamation point and three sets of brackets like this: ![image name](link to image)(size of image). You can also insert code snippets in your text by placing it in the middle of a pair of these guys '```' here is an example of a simple c++ hello world program to show how your snippet would look:
12
13 ```
14 #include <iostream>
15 using namespace std;
16
17 int main()
18 {
19     cout<<"Hello World!"<<endl;
20 }
21 ```
22
23 Another thing I love about using Markdown is it's portability. Markdown files can be edited using literally any text editor and can be easily shared using version-controlled platforms like Github. Markdown files can also be very easily converted into various formats including pdf, docx, latex and html using tools like pandoc or any other converters.
24
25 Markdown is very popular for writing research papers, lecture notes and even presentations. It's also a great option for taking down notes in class. As technology continues to evolve, Markdown remains a valuable tool for anyone looking to streamline their writing and documentation process.
26
27 I would like to conclude by restating that Markdown is a very efficient and versatile markup language that simplifies formatting of text. It's simplicity, portability and compatibility make it a preferred choice for a wide range of applications, from writing blog posts to academic writing.
```

Сохранение изменений на сайте

Я перенесла все изменения в репозиторий блога моего github:

```
mwakutaipa@mwakutaipa:~/work/blog$ git commit -am "skills and acheivements"
[main 7bc2370] skills and acheivements
6 files changed, 71 insertions(+), 29 deletions(-)
create mode 100644 content/post/Markdown/featured.png
create mode 100644 content/post/Markdown/index.md
create mode 100644 content/post/lastWeekOfMarch/featured.jpg
create mode 100644 content/post/lastWeekOfMarch/march.md
```

Рис. 10: to blog repository

Я перешла в каталог public и перенесла все изменения в репозиторий сайта моего github:

```
mwakutaipa@mwakutaipa:~/work/blog$ cd public
mwakutaipa@mwakutaipa:~/work/blog/public$ git add .
mwakutaipa@mwakutaipa:~/work/blog/public$ git commit -am "skills and acheivements"
[main e981286] skills and acheivements
 42 files changed, 6106 insertions(+), 123 deletions(-)
 create mode 100644 post/Markdown/featured.png
 create mode 100644 post/lastWeekOfMarch/featured.jpg
 create mode 100644 post/lastWeekOfMarch/Пустой документ
```
