Цель работы

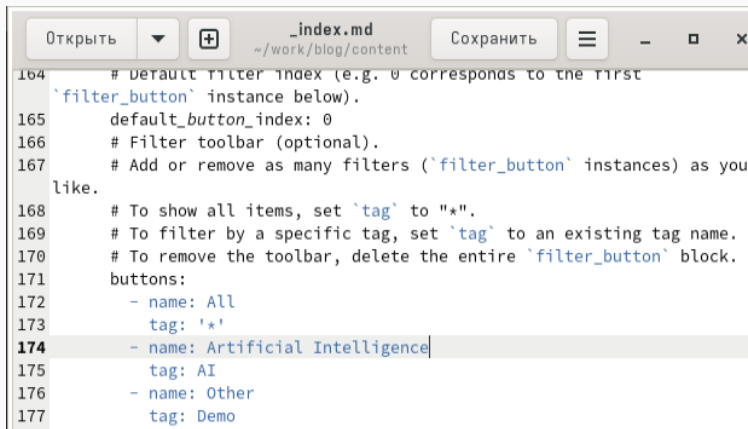

Отредактировать сайт.

Выполнение работы

Перешла в каталоге AI and job disruption, вставила фотографию featured.png и создала index.md. Написала некоторый текст в этом файле и сохранила изменения:

A screenshot of a code editor window. The title bar shows 'index.md' and the file path '~ /work/blog/conte...'. The editor contains a YAML file with the following content:

```
1 ---
2 title: Automation and Job disruption
3 summary: A summary of why I chose to research on aforementioned topic.
4 tags:
5   - Artificial Intelligence
6 date: '2024-05-04'
7
8 # Optional external URL for project (replaces project detail page).
9 external_link: ''
10
11 image:
12   caption: AI
13   focal_point: Smart
14
15 # Slides (optional).
16 #   Associate this project with Markdown slides.
17 #   Simply enter your slide deck's filename without extension.
18 #   E.g. `slides = "example-slides"` references `content/slides/example-
19 #       slides.md`.
19 #   Otherwise, set `slides = ""`.
20 ---
21
```

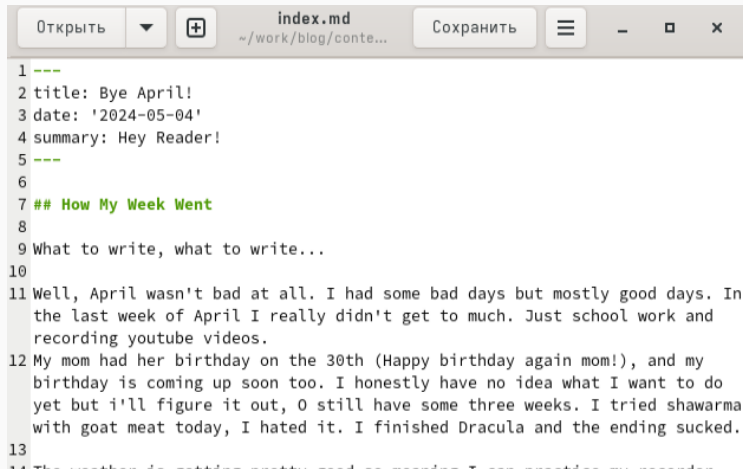

```
164 # Default filter index (e.g. 0 corresponds to the first
    `filter_button` instance below).
165 default_button_index: 0
166 # Filter toolbar (optional).
167 # Add or remove as many filters (`filter_button` instances) as you
    like.
168 # To show all items, set `tag` to "*".
169 # To filter by a specific tag, set `tag` to an existing tag name.
170 # To remove the toolbar, delete the entire `filter_button` block.
171 buttons:
172   - name: All
173     tag: '*'
174   - name: Artificial Intelligence
175     tag: AI
176   - name: Other
177     tag: Demo
```

Рис. 2: изменение Deep learning на Artificial intelligence.

Добавить пост по прошедшей неделе

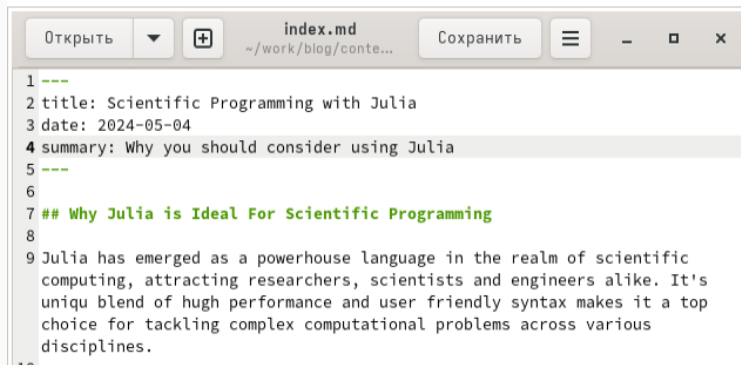

Перешла в `~/blog/content/post` и создала новый каталог. В нем вставила фотографию `featured.png` и создала `index.md`. В написала о неделе и сохранила изменения:

A screenshot of a code editor window. The title bar shows the file name 'index.md' and the path '~ /work/blog/conte...'. The editor has buttons for 'Открыть' (Open), 'Сохранить' (Save), and a menu icon. The code is as follows:

```
1 ---
2 title: Bye April!
3 date: '2024-05-04'
4 summary: Hey Reader!
5 ---
6
7 ## How My Week Went
8
9 What to write, what to write...
10
11 Well, April wasn't bad at all. I had some bad days but mostly good days. In
12 the last week of April I really didn't get to much. Just school work and
13 recording youtube videos.
14 My mom had her birthday on the 30th (Happy birthday again mom!), and my
15 birthday is coming up soon too. I honestly have no idea what I want to do
16 yet but i'll figure it out, 0 still have some three weeks. I tried shawarma
17 with goat meat today, I hated it. I finished Dracula and the ending sucked.
18
19 The weather is getting better and so is my mood. I am excited for summer.
```

Добавить пост на тему по выбору

Создала еще один новый каталог и в нем вставила контент о научном языке программирования Julia:

```
1 ---
2 title: Scientific Programming with Julia
3 date: 2024-05-04
4 summary: Why you should consider using Julia
5 ---
6
7 ## Why Julia is Ideal For Scientific Programming
8
9 Julia has emerged as a powerhouse language in the realm of scientific
  computing, attracting researchers, scientists and engineers alike. It's
  unique blend of high performance and user friendly syntax makes it a top
  choice for tackling complex computational problems across various
  disciplines.
```

Рис. 4: пост по Julia

Далее сохранила изменения и проверила все на локальном сервере. После этого я перенесла все изменения в репозиторий на гит:

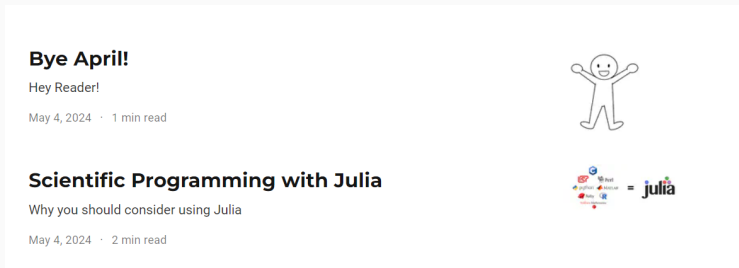

Рис. 5: новые посты
